

# Triad InRoom Gold LCR

Serious home theater requires serious speakers...speakers capable of faithfully reproducing pyrotechnics, nuance and everything in between. Triad is proud to introduce your ticket to audio realism, the InRoom Gold LCR.

Triad's all new InRoom Gold LCR features proprietary drivers and an over-built, acoustically inert enclosure for low distortion, high sensitivity, and high power handling. The performance begins to approach that of the formidable Triad InRoom Platinum LCR, but at a more moderate price. The Gold LCR mates well with the best separate electronics but also is compatible with A/V receivers, and is equally adept at reproducing music and movie soundtracks.

To visually blend into your décor, the InRoom Gold LCR is available in a variety of book-matched real wood veneer, as well as custom matched paint and veneer options.
