Exploring article-level impact

F1000Prime has **partnered with PLOS** (Public Library of Science) to provide enhanced information to researchers on the impact of their published articles. 'F1000Prime recommended' badges and scores have been added to all PLOS journal articles that have been selected for inclusion in F1000Prime - **more than 3,000 articles**.

Adding the **F1000Prime Faculty's** scores to PLOS's article-level metrics gives authors of important articles more relevant information on the impact of individual articles **than the Journal Impact Factor**, and will help guide readers to expert commentaries on important papers. Faculty of 1000 encourages other publishers and institutional repositories interested in using and displaying F1000Prime scores to **contact us**.

1,367 recommendations added in the past month. Below is a selection:

Implanting fake memories

Scientists have created a false memory in the mouse brain -- work that is of great significance to medicine, the law and democracy.

Renal renovation

A novel approach to bioengineering functional kidneys: a human kidney stripped of its cells serves as a scaffold for regenerating the complex organ.

Our innovative **open access journal** offering rapid publication, open peer review and open data.

F1000 on the road

Over the next few weeks, we'll be presenting our products in different cities across the world and attending a number of conferences:

September 9th:

Young Life Scientists' Symposium (Bristol, UK)

September 10th-13th:

Interscience Conference on Antimicrobial Agents and Chemotherapy 2013 (ICAAC) (Denver, CO; USA)

20-year clues for Alzheimer's

This article presents clear evidence that the biochemical pathways thought to lead to dominantly inherited Alzheimer's disease can precede symptoms by more than 20 years.

F1000Prime Reports

Open-access review journal, reporting on the hottest topics.
