---

1. I sent the photos to Carlton Dowe and he called me to say that the only reason the equipment was still there was because they had one more plane to remove. That will now take more time because of a court order so the equipment will be removed tomorrow. It costs them money every time they move the equipment.
2. Dowe still wants to meet with you re the Maintenance Building. When will you be back so I can set that up?
3. FYI - Dog Island is a nature preserve - I have attached a list of all the offshore islands and cays for your review.
4. Hugo Hodge, CEO of WAPA and Lynn Millin Maduro, Commissioner of Property and Procurement, are willing to meet with you with regard to your idea of using one of these islands or cays for energy production.
5. Is there anything you need me to do with regard to your meeting with UVI?
6. I am still trying to get more info on GSJ, specifically, who owns the other 13 parcels.

With warm regards,  
Cecile
