Dear Jeffrey,

You will find attached some 3D sketches of the kitchen/screening room/master suite area.

Again they are only sketches but able, I hope, to illustrate in a constructive way the last talk we had on the subject.

What I did try was to anchor the main terrace and the succession of tiers with the staircase and to provide this area with a feeling of uniformity. I also privileged the view from and around the staircase leading to the master suite.

I would also make sure you understand that I really appreciate the opportunity you gave me to be working on this project, trying my best, sometimes with obviously poor results, to translate and to integrate your vision with what I think would be the best for the final design.

On a more personal note I would like also to let you know how much I sincerely liked meeting you and, whether we decide or not to go on with the project, I would like, nevertheless, to thank you for the friendly and sometime rather straightforward way you opened the door of Little Saint James.

With the new year around the corner, it's a good time to make wishes and to present you with my very best ones for 2011. As far as I am concerned, I do wish that we will find the right way to communicate and to bring this project on the right track.

With my very best regards.
Christian.
