I forward this with no knowledge of the person below other than he called and said he enjoyed having you as a teacher in Dalton. I suggested I didn't presume to know how to reach you easily and didn't get his hopes up... He sounded like he WAS a student of yours and seemed to want mid-career "advice". You can say you never got it if you choose to ignore it :)

Dan,

My name is Bob Rossi. I saw your name related to Jeffrey Epstein's science blog and am reaching out to you as a way to reconnect with Jeffrey Epstein.

I was a student of Jeffrey's as a Junior and Senior at Dalton in '74-76. I was in his combined Physics & Calc AP class, and later in an Advanced Physics class with just two others - Ben Grosf and David Asch. No one took more classes with him than I did. Like Jeffrey, I was an outerboro kid who was transplanted into the upper east side - you could say I was the token Italian scholarship kid in my grade. By the way - I later went to Cornell as an engineering major, NYU for finance and now work at UBS.

I am reaching out to Jeffrey to reconnect. He's not on facebook so I was glad that I came across you as a way to make that connection again.

My hope is to get together with Jeffrey to reminisce about old times, get advice about my 10 year old finance career, and just to have some fun. I know you were concerned that I may be "pitching" Jeffrey and I can emphatically assure you that is not the case.

My work contact information is below. My private contact info is:

[REDACTED]  
[REDACTED]  
[REDACTED]

Thanks in advance for your help.

Bob
