

Float Plan Vetting

Likewise and unless a Private Vessel Query and Targeting Team (PVQTT) is created, each authorized reporting location will also be responsible of vetting the applicable filed float plans that appear on the SVRS application.

For more information on the SVRS application and your reference, attached is a document of frequently asked questions. This document is in the process of being updated. The new version will be disseminated at the end of December. In addition, SVRS data will be updated to reflect your days & hours of operation for your AOR. You can also visit http://www.cbp.gov/xp/cgov/travel/pleasure_boats/boats/svrs.xml.

Please ensure this policy is widely made known and implemented accordingly throughout your ports of entry. If you have any questions regarding this matter please contact Carlos J. Gomez at [REDACTED]
