---

Hi Darren attached are pictures from Cadogan Tate warehouse of the desk two white chairs, a rug and lamp I found one white chair damaged with a 2.5" cut in the leather, that chair needs to be replaced the second chair is ok, the Led lamp is missing the power supply cord the lamp will not work without it. we unrolled the carpet found defect in carpet picture taken of defect. The desk has a natural finish with uneven tones and finish the joints where shelves meet are slightly discolored, Inside draws have a different finish from top of desk, sides of top of desk look like laminate not solid oak, top of desk above pull draws have strip wood on edge 1" wide runs across desk not a solid piece. i hope this helps Rich.
