Attachments: 20111026162004858.pdf

the dimensions I previously sent were distances from the center of the axis, not the dimensions between the dots

this attachment shows the width in red of the concrete expanding from 1' 0" at the start and growing to 7' 3"

3 o'clock being 5' 4" and 6 o'clock being 3' 9"

the pebble band starts at 12" in the center and grows in width by 1" for every 7' in length to 24" at the end
