Bank products and services are offered by JPMorgan Chase Bank, N.A. and its affiliates. Securities products and services are offered by J.P. Morgan Securities, LLC, member NYSE, FINRA and SIPC. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. J.P. Morgan Securities LLC or its brokerage affiliates may hold a position or act as market maker in the financial instruments of any issuer discussed herein or act as an underwriter, placement agent, advisor or lender to such issuer. The views and strategies described herein may not be suitable for all investors. This material is distributed with the understanding that it is not rendering accounting, legal or tax advice. Consult your legal or tax advisor concerning such matters. This material should not be regarded as research or a JPMorgan research report. Securities and quotations referenced herein are subject to change and availability without notice. Actual quotations could be higher or lower subject to market conditions and are believed to be reliable, but JPMS LLC does not warrant their completeness or accuracy. JPMS LLC cannot guarantee that different prices would not be available elsewhere and suggests that several valuations from other sources be obtained.

YTW (Yield to Worst) is the yield to maturity if the worst possible bond repayment takes place. If market yields are higher than the coupon, the yield to worst would assume no prepayment. If market yields are below the coupon, the yield to worst would assume prepayment. In other words, yield to worst assumes that market yields are unchanged.

Moody's and S&P ratings are the current opinions of the creditworthiness of an obligor that assess the likelihood of default. Obligations rated Aaa/AAA are judged to be of the highest quality, where the obligor's capacity to meet its financial commitment is extremely strong. Obligations rated Baa/BBB exhibit adequate financial security where the obligor's capacity to meet its financial commitment is susceptible to adverse economic conditions.

Duration measures the sensitivity of bond price changes to interest rate movements. Bonds with higher durations carry more risk and have higher price volatility.

Investment products: Not FDIC insured - No bank guarantee - May lose value
