Wolfram Insider for Education

Issue 2, 2016

IN THE SPOTLIGHT

Wolfram Programming Lab »

Try today's most advanced programming language and get introduced to modern computational thinking. Programming Lab's built-in, step-by-step Explorations make it easy to create amazing programs in minutes—even if you've never coded before.

FROM THE EXPERTS

Introducing Wolfram Programming Lab: Virtual Workshop for Educators »

Explore methods for introducing computational thinking and programming activities to middle- and high-school students at this free virtual workshop for educators on February 25. We'll cover Wolfram Language Explorations using the new Wolfram Programming Lab. No programming experience is needed.

NOW AVAILABLE

Finance Platform 2.2 »

Wolfram Finance Platform 2.2 expands on capabilities in Version 10.3 of the Wolfram Language with enhanced time series analysis, comprehensive graph computation, and much more. See what's new.

FROM THE EXPERTS

Office Hours for the Wolfram Cloud »

Attend online office hours to ask our experts questions about Wolfram Language capabilities, get guidance on your cloud projects, and learn from other users.
