

HOME PAGE:

1. The 'AI Projects' should be a menu at the top with the others. It's at the bottom of the site but doesn't link thru. See attached doc for content for that page.
2. Change the landscape photo to one that is AI related. Will send a few jggs.
3. The alternating blinking headlines over the photo should be 'AI Projects', 'AI Press' and 'Social Media'. They should link to the AI Projects page, the Media page and the foundation's blog feed respectively. Right now the sites lead to non-AI press releases. It's also duplicate content.
4. Twitter link at the bottom should link to Jeffrey_Epstein. Not Epstein_Jeffrey. I'm trying to get rid of the latter.
5. Navigation title at the bottom, should have all the menu categories under it.

Currently in AI: Jeffrey Epstein Helps Launch AI in Ethiopia (Put title in

lower case)

Artificial Intelligence and information technology is ~~actually~~ thriving in Ethiopia thanks to an innovative AI group in Hong Kong called OpenCog, ~~and~~ the funding of the Hong Kong government and the Jeffrey Epstein VI Foundation in New York. The recipient of funding was the AI lab in Sidist Killo, called Addis AI Lab and it has quickly become the computer science pioneer in Sub-Saharan Africa. "We are very excited by the technology coming out of the Addis AI Lab," Jeffrey Epstein asserted, founder of the Jeffrey Epstein VI Foundation, which supports cutting edge science research around the world. "With economic and education growth rates as one of the highest in the world, it makes perfect sense to lay an AI foundation in the heart of Ethiopia's capital."

In fact, Ethiopia has an astounding foundation for science technology: 95% of students graduate from primary school, 60-70% from high school, and there are almost 100 universities. The software market has also doubled in the past three years and the Ministry of Trade and Industry has registered over 700 licensed companies in computer technology and 95 software and computer networking businesses.

Similar to OpenCog, its founder in Hong Kong, the Addis Lab provides free, open-source programming to the community at large and collaborates with universities, schools and the government, such as the Addis Ababa Institute of Science and Technology. Founded by Ben Goertzel, Chairman of OpenCog and Getnet Asefa, Manager and co-founder of Addis AI lab, the team's focus includes machine learning based data analysis, computational linguistics, computer vision, mobile robots and cognitive robotics, cognitive architectures and artificial general intelligence.

"Addis AI's goal is to further sustainable and cutting edge development in Ethiopia and Africa by what's called, technology leapfrogging: jumping straight into advance technological applications to save time and keep up with the developed world," Jeffrey Epstein commented. "Ethiopia has the ideal educational basis for this and to be catapulted into the future."

ABOUT PAGE

1. The hover over link needs to change to "About". Right now it says AI Projects.
2. Change Jeffrey's photo to the one attached.
3. 'About Jeffrey Epstein AI' page title should be in lower case and pulled up one line space on the page.
4. Last word on the page "Humanity" should be "Humanity +."

AI PROJECTS PAGE

1. Insert as next menu title link. See attached doc for content.

MEDIA PAGE

1. The first article Radical emotional software doesn't link to the right page. It should link to: <http://www.forbes.com/sites/drewhendricks/2013/10/02/science-funder-jeffrey-epstein-launches-radical-emotional-software-for-the-gaming-industry/>

BLOG PAGE

1. Blog article titles should be in lower case.

CONTACT PAGE

The foundation is called: The Jeffrey Epstein VI Foundation. This needs to be corrected. The VI was left out.
