Hi [REDACTED] . Daniel keep writing me some bullshit , like he knows "everything " about me etc , I need to give him his broke computer back which he borrowed me when I burned mine . And a paper of him . And when I asked him how can I pass it to him - he said give it to Valdson . I find it strange and I asked if he has any other people in paris - he said that he will call to Valdson again .

And he says me - I will give you a lot of surprises , you don't know me , you bitch . I told him that it doesn't bonds with out topic and asked him to forget me .

And he said" I forgot you , I just care about my best friend Jeffrey and I will make everything to show him how you play with him and bullshit .

And now I feel strange. .
