This week in Kickstarter

We're all over the map lately: this week, Kickstarter opened up to creators in the Netherlands! Also, we're headed to PAX East this weekend. Here's where you'll find us.

Projects We Love

2000 Student Projects to the Edge of Space

2000 Student Projects to the Edge of Space

By John Powell

What happens to a marshmallow at 100,000 feet? A group of students are about to find out. They'll send ping pong balls that contain art projects (and a few marshmallows) to the edge of space via weather balloon. When the balloon returns, they investigate the effects. It's a sky-high science demo!

![The Mini Mobile Robotic Printer]

The Mini Mobile Robotic Printer

By ZUtA Labs Ltd.

The printer's been tethered to desktops for too long. Everything else has gone mobile, yet we find ourselves furiously searching for the nearest place to print a document. The Mini Mobile Robotic Printer wants to change that — they're making a tiny printer that's truly portable. Watch the video to see it in action!

Beardo the Movie - a documentary

By DIGICO Shoot | Post | Design

Every fall, hundreds of bearded individuals get together to find out who cultivated that year's superlative facial hair. Only one beard can win the title, and *Beardo The Movie* is there to document it all. You'll see a fantastic array of furry faces that know what it takes to win Best Facial Hair in the World. Move over, Movember. This is the big leagues.

The most backed project of all time.
Veronica Mars. Now on iTunes.
