

Mitral Valve

There is mild to moderate mitral annular calcification. There is mild mitral regurgitation.

Tricuspid Valve

The tricuspid valve is normal. There is moderate tricuspid regurgitation. Doppler findings do not suggest pulmonary hypertension.

Aortic Valve

Mild calcific non-stenotic aortic valve thickening. No aortic regurgitation is present.

Pulmonic Valve

The pulmonic valve leaflets are thin and pliable; valve motion is normal. Trace pulmonic valvular regurgitation.

Great Vessels

The aortic root is normal size. The pulmonary artery is normal size.

Pericardium/Pleural

There is no pericardial effusion.
