Attachments: Existing_Carpet.JPG; Existing_Tile.JPG

Good Evening,

I just wanted to give you a quick update on the work at the BH. As mentioned on your last visit things are looking old, hence have been removing/replacing dated "original to build" items - fans, bathroom lights, shower mixers, shower rods etc.

As noted in the Project Report we continue to work with the interior, repairing & painting over the existing yellow with a soft linen white & white trim but as seen in the pictures the "original build installed carpets" are looking very shabby & worn.

I would suggest that we either replace with new carpet or carry the tile that is in the living room, kitchen & bathrooms, this option would pretty much guarantee there would be no further flooring replacement in the future.

How would you like to proceed, carpet or tile?

Warmest regards

Karen
