We all have moments when we look for inspiration, and who knows when these moments will strike?

Android

Our new free Android app allows you to watch all of the speakers in the Web of Stories Lives channel

(<http://www.webofstories.com/lives>).

Should you want to download any of the recordings on to your own mobile device, you can do so by making an in-app purchase for each speaker (cost £5.99/\$8.99*).

Each of the Web of Stories speakers has taken the time to record, in truly fascinating detail, the story of their lives. These recordings include captivating insights about their childhood, momentous decisions, career milestones, life-changing achievements and personal highs and lows.

And you, too, can record your own story since everyone has a story to tell. You can talk about anything that has influenced you in some way. It could be the first time you rode a bike, saw somewhere new in the world, met an idol or achieved something momentous – the story is yours to tell. Simply record it on the app, download it to the Web of Stories website and, if you want, share it with others on social media sites.

To download the new apps, visit

and follow the prompts.

*Prices correct at 28.04.2014. Web of

There can be few things more genuinely inspirational than listening to the stories of others, particularly those whose work has touched or changed the world in some way. In recognition of this, Web of Stories has launched a series of new apps so you can easily access stories of individuals who are guaranteed to impress, interest and intrigue you, all from your mobile phone or tablet.

iPhone

Six iPhone apps are now available, featuring the American computing pioneer Donald Knuth, the physicist Freeman Dyson, the neurologist Oliver Sacks, the author Philip Roth the writer Stan Lee, and the biologist Sydney Brenner.

Whether you're intrigued by Knuth's memories of writing *The Art of Computer Programming*, Dyson's work on the Manhattan Project, Brenner's recollections of working on the genetic code, Sack's tireless commitment to his patients, Roth's frank and witty novels, or intrigued by how Lee created his iconic characters for Marvel comics, you cannot fail but to be inspired and moved by their creativity, imagination and vision.

Each iPhone app is available for £5.99/\$8.99*.

Stories reserves the right to amend these prices.
