Good afternoon Bossman,

The bad odor is coming from the New septic tank that Danny put in about a year ago both Cabana 1 & 2 are connected to it.

Gerry and I went this morning to check for the bad odor but was unable to smell anything, Gary suggest that we go back to the Cabanas around 10am-11am when the sun is much hotter.

We just went back to the Cabanas and sure enough the smell came back, as the Sun becomes hotter during the day the septic tank fumes go back up through the Cabana plumbing lines.

Danny V. is not in today to address the odor issue.

Ann R.
