Survival of the self. Survival of the tribe. . - , tribes often are the same family. Self is often the same dna. . it is all a construct to help human survive. You perceive physical acoustical visual objects , that allow you to survive. . you're perceptions are bounded by bandwidth. Frequency width. Hz. temp. etc. like a culture has it boundaries. etc

What is that which wants to survive ?

Why should a biological organism , with chemistry and physics as it's building blocks want to survive ?
