Your " instrument " is way out of tune. And you need to be heard. Mnuchin getting all his advice from Eddie lampert   two goofballs . Krugman article wildly misleading.   Team of smart responses.   And principled positions.

I go back to my original idea. 6 months ago. Donald should pardon everyone involved. cohen manafort gates. flynn, etc The Whole gang. He has the unfettered right. He will decide the timing otherwise the dems will slow drip him for months. Takes most of the air out of the investigations and say. This is bad for the country , his pardon power is unlimited. I am happy to discuss any plan that you have

for yourself.   I will be all the help I can,   people that like you are in agreement. Your risk vs reward is not what it should be

My 2019 insite. Is we ignore the fact that our inputs take time to process before they are
perceived. .   like when one blinks the brain fills in the gap or the blind spot on the retina

is not seen.   If the input goes to memory fast, we think we've seen it before. deja vu.

With regard the space embedding.   How do you describe the smaller distance above a line to go over it. .   the tiniest of another dimension. Only big enough to jump a line.

cognitive latency and buffering, . Not very well understood. I think that the delay in perception from input explains deja vu. The input went to memory first.

Sodium is a name given by scientists to a mode of knowing in consciousness . It's as much
a human construct as body mind universe - useful construct
Reality is that which wants to know and which creates all constructs - that which we call "
I "
We are bamboozled by our own constructs

Sodium is a name given by scientists to a mode of knowing in consciousness . It's as much
a human construct as body mind universe - useful construct
Reality is that which wants to know and which creates all constructs - that which we call "
I "
We are bamboozled by our own constructs
