Im rarely pessimistic, i wonder what the probability is? Or in this case as it is a binary decision appropriate to use "odds"

On subjective probability, I think life on other planets complex example. Is stock market one continuous event with much Or is this moment unique. If u grant meaningfulness if talking odds on one off events we are down to semantics. Where u say odds I say subjective probability. If u are rarely pessimistic does that discredit your optimism. Suppose instead of peril it was dunking a basketball or going to an island w Angela Jolie

Odds are limited to binary outcomes. . since you are immobile. Do some homework. . I concede your point on pessimism but would under bayesian rules. Feel comfortable. As humans are biased toward bad outcome avoidance. . She is never ever going to find another Larry summers. Probability ZERO

Why in my interest. Odds of success. I think another encounter at some point one third. Sustained series one fifth.

Best shot for me. She gives up on marriage. Finds me invaluable and interesting and get her to conclude she can't have it without romance/sex without deciding I'm weak or vengeful
