94FPW-PIR is the perfect energy-saving and money-saving replacement for electric or gas-
powered outdoor lighting, plus it offers the security benefit of motion detection. This rust-
resistant cast-aluminum solar lantern, which features the attractive design of a 19th-century
gas lamp with a powder-coated black finish and real beveled glass panes, comes with all the
hardware for mounting the unit as an outdoor wall sconce; on flat surfaces, such as pillars
or columns; or at the top of a three-inch-diameter lamp post. No electrical wiring is needed.
Just install the light fixture, and let the sun do the rest. The Victorian's internal Lithium
Ion battery pack charges when sunlight hits the fixture's integrated solar panel. At dusk, 13
bright-white LEDs will turn on automatically and shine at 100 lumens. Output brightens to 200
lumens for 45 seconds when the motion sensor detects movement up to 20 feet away. Gama
Sonic's patented cone reflector enhances the glow and multidirectional light dispersal. The
unit is designed for dusk-to-dawn operation after its battery has been fully charged during
the day. Beyond providing a superior combination of light brightness and duration, Gama Sonic
solar light fixtures are known for their physical durability. The Victorian's monocrystalline
silicon solar panel is protected by weather-resistant, cleanable tempered glass that helps
ensure long-lasting reliability. The light's replaceable, plugged battery pack is good for
about 1,000 charges. With proper setup for optimal sun exposure, a sunny day without cloud
cover should be sufficient to provide a full recharge. Recharging speed will vary based on
weather conditions, but no charging will occur if direct sun does not shine on the solar
panel. Do not locate the light fixture in a shaded area. At Gama Sonic, our goal is to build

light fixture model GS-53FPW-PIR is the perfect energy-saving and money-saving replacement
for electric or gas-powered outdoor lighting. This rust-resistant cast-aluminum solar lantern
with a sleek, timeless design and a powder-coated black finish makes a stylish addition to
your home's exterior. It includes all the hardware for mounting as an outdoor wall sconce; on
flat surfaces, such as pillars or columns; or at the top of a three-inch-diameter lamp post
(post not included). No electrical wiring is required. The Weston's internal Lithium Ion
battery pack charges when sunlight hits any of the four integrated solar panels. At dusk,
nine bright-white LEDs will turn on automatically and shine at a brightness of 75 lumens.
When motion is detected up to 15 feet away from the fixture, light output doubles in
brightness to 150 lumens for 45 seconds. Gama Sonic's patented cone reflector enhances the
glow and multidirectional light dispersal. The unit is designed for dusk-to-dawn operation
after its battery has been fully charged during the day. Gama Sonic products are both highly
functional and durable. The Weston's monocrystalline silicon solar panels are protected by
weather-resistant, cleanable tempered glass that helps ensure long-lasting reliability. The
light's replaceable, plugged battery pack is good for about 1,000 charges. With proper setup
for optimal sun exposure, a sunny day without cloud cover should be sufficient to provide a

{"desc":"The Cadence collection one-light post lantern has a decorative and fashion oriented
design with modern classic styling. The etched glass pillar diffuser inside the clear water
seeded glass gives off a soft glow of light. Uses GU24 base compact fluorescent lamps for
energy efficiency. Cast aluminum, powder coated frame in Black.\r<br\/><ul
