

Working on WAPA
DEC 7th
DEC 8th

iMessage
Fri, Dec 8, 9:44 AM

Hey Clinton & Cordell,
Just checking on you guys.
If all goes well at Cabrita Point this morning do you think we will have power tonight?
Thank you so much for coming out yesterday.
Ann R.

Clinton: WAPA

Hey we will try this afternoon

I will get back to you with the exact time

Thank you so much. I greatly appreciate it

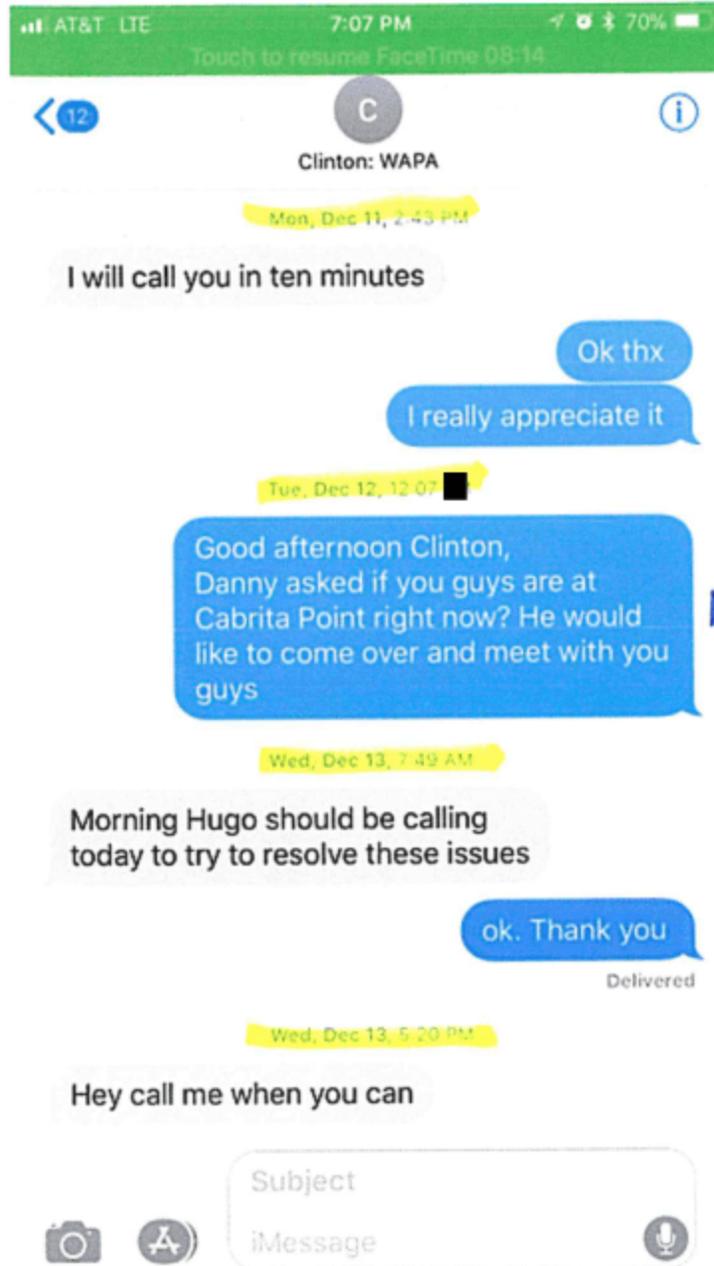

Fri, Dec 8, 6:11 PM

Good night Clint,
Any update on Cabrita Point or Power for LSJ?

Sorry Clinton

Good night Clint,
Any update on Cabrita Point or
Power for LSJ?

Sorry, Clinton

Clinton: WAPA

Hey it tripped again we have to
make some more checks on the
cable

ok, Thank you so much

Hey Clinton,
Danny our terminal facility manager
would like to go out to Cabrita Point
with you and your guys tomorrow?
If possible, What time should I let
him know?

Clinton: WAPA

Ok will do

I will call you to discuss

awesome. Thank you!

Subject: LSJ

Good morning All,

We have started the work on LSJ. From my initial estimate, it will take 2 full days to get the cable spliced with the new manhole in place. Once that takes place tomorrow we will then test the cable (Hi-Pot test) and then leave the cable energized for at least 24 hours. After that period, we will then go through the steps to put LSJ back on WAPA's Grid.

HH

yes, Friday & Saturday (2 days)

Today was a wasted day because the Manhole still had water in it even though Danny said it didn't. It's being pumped out again as we speak

WAPA & Liston can't do anything around water or in water

Manhole with Fiber box found. Liston found the Manhole. I asked Danny why he sent the guys to 3 different manholes for the past 2 days and his response was "He was just guessing" at least they found it.

Liston & his crew will now unsplice the Fiber & pull it out of WAPA's Main Manhole. Bryan's electric and LSJ crew will put the New Manhole in the ground for Bryan's electric to complete what's needed for Hugo

Saturday work is needed by LSJ & Bryan's electric. Hopefully Monday morning we will have WAPA if all goes well

1 message

Jermaine Ruan <[redacted]>
To: de Jongh Cecile <[redacted]>

Sat, Jan 13, 2018 at 8:25 PM

Good Evening Cecile

The under water fiber cable has been placed in the new manhole. We Pull in new fiber cables from the data center vault to the manhole in the heavy equipment shop to be spliced to the underwater cable.

Wednesday Liston will begin finalizing the re-termination and fusion to bring the back to ready status for when viya/ vinga is ready to restore service to cabrita point.

I remind Danny again that the slug need to be removed from the culvert outside the mechanics bay and it needs to be encased better to prevent slug build up again. The culvert not only contains fiber but power as well.

Regards
Jruan

I just heard there is a possible je visit in addition to the guest flying on Tuesday should I have Francisco associate reschedule the LSJ site visit?
