----

2. Installation

* Be sure to log on as a user with Administrator privileges to install the program.

* When the User Account Control dialog box appears during installation, click the [Continue] button.

* Be sure to select a local folder as the installation folder.

* Do not install the program directly under the root folder. If the program is installed directly under the root folder, it may not work properly. Install the program in a folder other than the root folder.

* Do not use the following characters for the installation folder name. If any of the characters below is used, the program may not work properly.
  / ; : , . * ? " < > |

* To use SharePoint(R) Server, you need to install Scan to Microsoft SharePoint first.

* You are considered to have agreed with the License Agreement of Scan to Microsoft SharePoint upon installing it.

* The license fee on Scan to Microsoft SharePoint shall be included in that on the fi series.

* A warning message may appear during the installation of ScanSnap Manager for fi Series if a resident program such as anti-virus software is running.

----

3. Uninstallation

* Be sure to log on as a user with Administrator privileges to uninstall the program.

* When the User Account Control dialog box appears during uninstallation, perform one of the following:
   - If you are logged on as a user with "administrator" privileges, click the [Continue] button.
   - If you are logged on as a user without "administrator" privileges, select a user with "administrator" privileges first, enter the password, and then click the [OK] button.

* Uninstall Microsoft .NET Framework after uninstalling Scan to Microsoft SharePoint.

----

4. Notes

1) About the operating environment

- This software does not guarantee reliable operations if used with Terminal Service Client or Remote Desktop Connection Client.

- To use this software, set the display to High Color or higher mode. If 256 or less color mode is selected, the display may be incorrect.

2) About supported drivers

- To use this software, you need to install the PaperStream IP (TWAIN) (32-bit) scanner driver.
