Attached for your review

Proposal for the replacement for the VFD for the Well Pump in Well B, \$13,598.00
2015 Proposal for existing VFD, \$13,412.00 Rogers Drilling

2015 the Well Pump for Well B was upgraded to 50 gpm 3 phase motor, in doing so a single phase to 7.5hp 3 phase VFD was installed.

The existing drive is very susceptible to voltage fluctuation and as of date the VFD needs to be reset frequently during the day.

This situation its making very difficult to achieve a constant water supply for domestic and irrigation proposes. It will need to be address if we are to achieve the qty of water required under the permit E 7871.

RMC Electric sourced the company that will supply the drive and the support

The new drive is 25hp vs the existing 7.7hp drive, this will handle the power fluctuations from the power company.

Can we proceed with purchase and install

regards

Brice Gordon
